Bug Reports List (* these are just short titles for the list, not the actual bug titles)

- ENTER CONTENT button not the same width
- one pattern missing
- labels are not capitalized correctly
- background color can't be black
- frames cover the QR code when the custom frame color checkbox is checked
- color in color picker doesn't change when hex code entered manually
- can't remove background from the uploaded logo
- How do I create a free QR Code? section - content problems
- number of steps doesn't correspond to the actual number of steps
- space between word colors and comma (colors ,)
- r in the Qr not capitalized
- location can't be manually chosen on the map
- location not selected when manually entering coordinates
- QR code doesn't open the map location
- wrong link for downloading the app from the app store
- no gradient checkbox for the circle shape
- pattern missing when the circle shape is selected
- QR code changes shape from circle to square when some frames are selected
- QR code not visible (turns to black) when the user clicks any of the buttons after some frames are selected
- Several Errors in Sign in option
- In profile option there is a symbol floating without any reason
- Error in main menu- Windows
- Map is not working in main menu.

Title

Orderific Bug Reports List

Charter

Mission- QR Code generator Objective- QR Code Generator for Free I included a few of the content bugs, which I actually spotted, I did not use any software for that. There are some sequential errors and some of them are not in sequence. All task is performed on Windows 11, Google chrome.

Preconditions

Session started • Duration 02:30:43 09h55 | 18-01-2024

01:43:47 | Screenshot • Comment

The screenshot shows the Orderific QR Code Generator interface. On the left, there is a large input field labeled "ENTER CONTENT" with the placeholder "Your URL" and the value "https://orderific.com". To the right of this is a generated QR code. The interface includes tabs for "URL", "TEXT", "EMAIL", etc., and a "MORE" dropdown. A sidebar on the right contains a "SHAPE" section and a "SET COLORS" section. The browser's developer tools are open, specifically the "Elements" tab, showing the HTML structure and CSS styles for the page. A red circle highlights the "SET COLORS" button in the sidebar.

01:54:23 | Screenshot • Comment

The screenshot shows the Orderific QR Code Generator interface after selecting the "SET COLORS" button. The "SET COLORS" section is now active, with "Foreground Color" set to "#8a6683" and "Background Color" set to "#8a6683". The generated QR code now has a black frame and a decorative floral border. The browser's developer tools are open, showing issues related to color specification in the CSS. A red circle highlights the "SET COLORS" button in the sidebar.

Steps- URL Tab

Enter Content and Your URL Tab is not of same size.

Description: The enter content button in the URL tab i.e 594px is Different in size as compared to the other tabs i.e 654px.

Steps- SET COLORS

The colors are not feeling up properly which result in damaging QR code

Click on the FRAME button and select any of the following frames (do not count the first "x" which is for no frame) - 9th, 10th, 16th, 17th, 19th, 20th, 22nd, 24th, or 26th.

Click on any of the buttons (e.g. SHAPE).

Description: The QR code is not visible (the whole section with the QR code turns to black) when the user clicks on the any of the button (FRAME, LOGO, CUSTOMIZE DESIGN, SET COLORS, SHAPE, or ENTER CONTENT) button after selecting one of the following frames (do not count the first "x" which is for no frame) - 9th, 10th, 16th, 17th, 19th, 20th, 22nd, 24th, or 26th. The QR code is visible when the user clicks on the FRAME button again.

00:03:45 | Screenshot • Comment

The screenshot shows the Orderific registration page. The form includes fields for Name, Email, Phone (+1), Country (United States), Password, and Confirm Password. A large orange button labeled 'Sign up' is at the bottom. The developer tools show several errors in the console, including 'ERR_BLOCKED_BY_CLIENT' for various network requests and DOM errors related to country code selection.

Steps- Sign in
In inspection table there pops so many errors.

00:07:42 | Screenshot • Comment

The screenshot shows the registration page with the following values entered: United States, 2134567, 1234567, and the 'Sign up' button highlighted. The developer tools continue to show errors, including 'ERR_BLOCKED_BY_CLIENT' and DOM-related issues.

Steps- Sign in
Set password
Description- Suggest form more strong Password.

00:12:29 | Screenshot • Comment

The screenshot shows the registration page with 'admin' as the name and 'admin@gmail.com' as the email. A red message 'The email has already been taken.' is displayed below the email field. The developer tools show errors related to country code selection and a password confirmation error.

- Step- Sign in, (The email has already been taken.)** This message should be pop up at the time of entering email, so the user don't have to repeat the process again and again.
- The password confirmation does not match.** As same as the previous message this message should also be pop up before clicking to sign in button.

00:17:38 | Screenshot • Comment

The screenshot shows the Orderific website builder interface. A blue circle highlights the Orderific logo in the top right corner, which is positioned above the user profile. The interface includes a search bar, a notification bell, language selection (English), and a user profile for 'admin' (Brand Owner). On the left, there's a sidebar with 'Create Website' and a 'Brand*' dropdown. The main area displays a template preview for a burger restaurant. A blue arrow points from the floating logo towards the 'Create Website' button. The bottom of the screen features an orange banner encouraging users to complete steps for a discount. The developer tools' 'Console' tab is open on the right, showing several errors related to failed resource loads.

Steps- Inside Profile

The Logo is unnecessarily floating on the screen.

00:24:24 | Screenshot • Comment

This screenshot shows the Orderific website builder interface with a different template preview. A large blue arrow points upwards from the floating logo towards the top of the page. The interface remains similar to the previous one, with the 'Create Website' button and the floating logo in the top right corner. The developer tools' 'Console' tab shows the same error messages about failed resource loads.

Steps- Website

Create website with AI

Description- Errors in the Page

(Create webpage) the demo pages are not aligned in a sequential way.

00:31:29 | Screenshot • Comment

This screenshot shows the Orderific website builder interface with a different template preview. A large blue arrow points upwards from the floating logo towards the top of the page. The interface includes a sidebar for 'Promotions' and a main content area with a food image and location information. The developer tools' 'Console' tab shows the same error messages about failed resource loads.

Steps- Website Builder

Website Setting

Description- The edit boxes are not aligned perfectly, and the QR generator is also not working Properly.

Console Issues

Steps- Customize Design button;

The check box i.e Custom frame color is not capitalize properly i.e Custom Frame Color.

01:06:13 | Screenshot • Comment

The screenshot shows the Orderific QR code generator interface. On the left, there's a text input field containing "Hi". Below it is a switch labeled "Enable Order & Pay" which is turned off. Under "SET COLORS", there's a "Custom frame color" checkbox checked, and a color picker showing "#704c69". A large purple frame surrounds the generated QR code. To the right of the QR code is a "Download QR" button. The browser's developer tools are open, specifically the "Issues" panel, which lists several CSS errors related to the frame colors.

Steps- Click on the FRAME button.
Select one of the following frames (do not count the first "x" which is for no frame) - 12th, 18th, or 21st.
Check the Custom frame color checkbox.
Description: When the user selects one of the following frames (do not count the first "x" which is for no frame) - 12th, 18th, or 21st, and checks the Custom frame color checkbox, the frame covers the QR code.

01:12:32 | Screenshot • Comment

The screenshot shows the Orderific QR code generator interface. The "Frame label" is set to "ORDERIFIC". The "Frame color" input field contains "#704c69" and has a checked "Custom frame color" checkbox below it. A yellow arrow points to the "Frame label" input field. The browser's developer tools are open, showing an error message about the frame color format.

Steps- Click on the FRAME button
Select the 1st frame (do not count the first "x" which is for no frame).
Check the Custom frame color checkbox
Enter the hex code (e.g. #704c69) in the input field for the custom frame color and click outside of the input field.
The frame color changes accordingly but the color in the color picker stays the same.
Description: When the user manually enters the hex code for the desired color, the color changes accordingly but the color in the color picker stays the same.

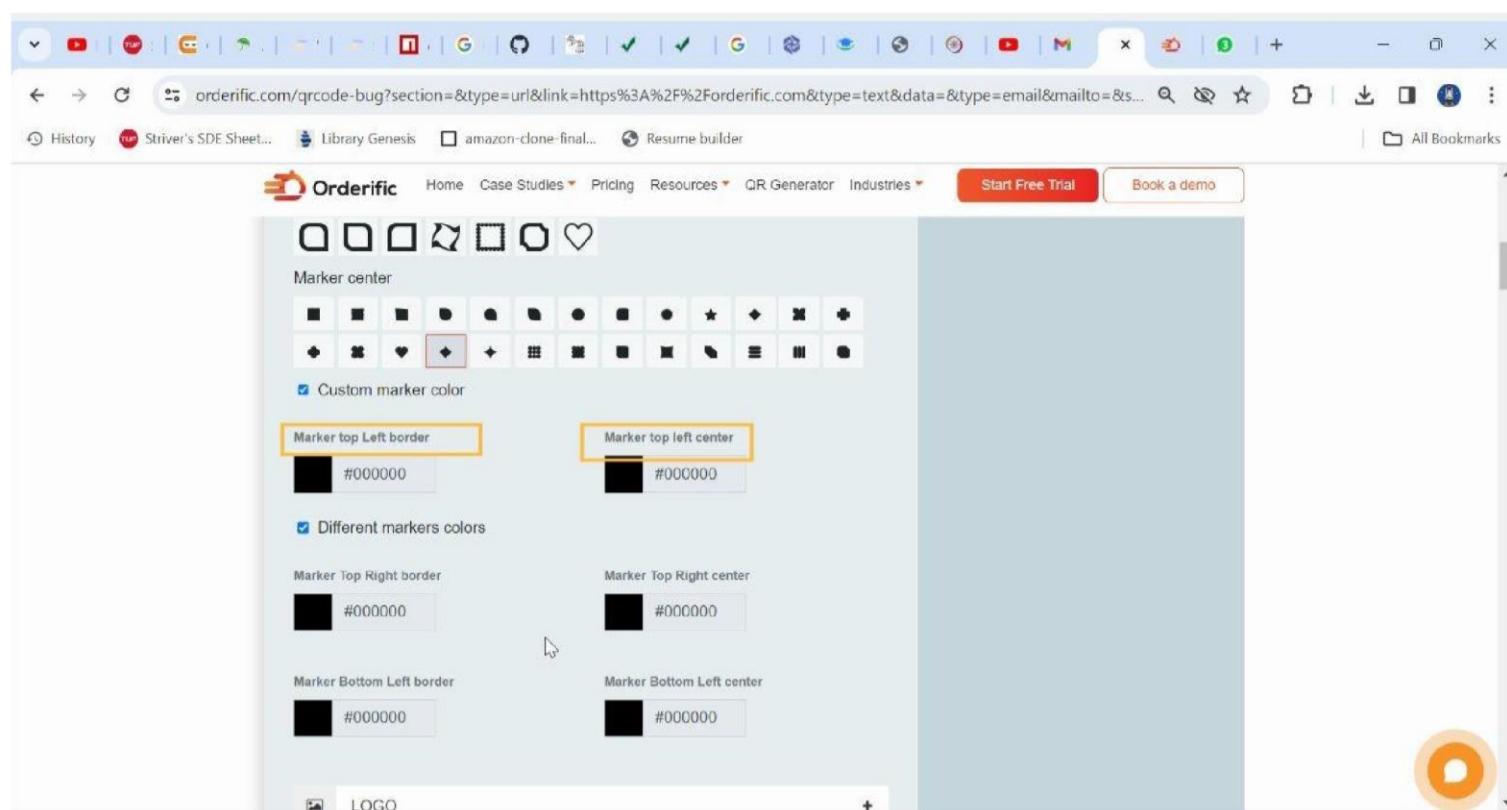

01:15:35 | Screenshot • Comment

The screenshot shows the Orderific QR code generator interface. The "Pattern" dropdown menu is open, displaying various geometric patterns. A yellow arrow points to the 17th pattern in the list, which is labeled "Special-Diamond". The browser's developer tools are open, showing an error message about the frame color format.

Steps- Click on the CUSTOMIZE DESIGN button
Click on the 17th pattern (special-diamond).
The 17th pattern is not clickable, and therefore the QR code pattern doesn't change from the previously selected (default) one.
Description: When customising the design, the 17th pattern (special-diamond) is not clickable and therefore cannot be displayed

01:18:13 | Screenshot • Comment

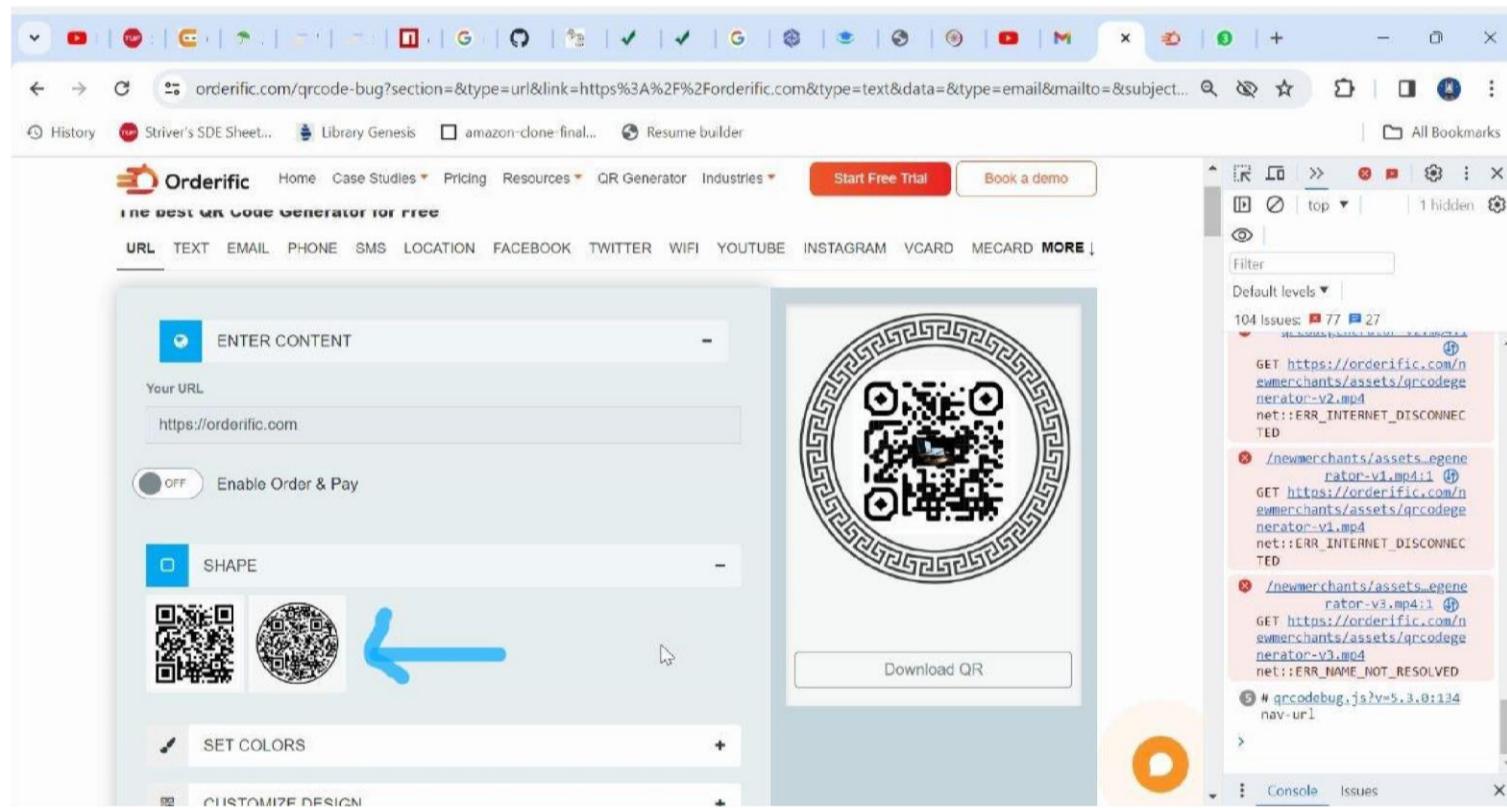

Steps- Click on the CUSTOMIZE DESIGN button.

Check the Custom marker color checkbox

Description: The Marker top Left border and Marker top left center labels below the Custom marker color section within the CUSTOMIZE DESIGN button are not capitalized correctly. The words Top and Left in both labels should be capitalized, Marker Top Left border and Marker Top Left center instead of Marker top Left border and Marker top left center

01:20:41 | Screenshot • Comment

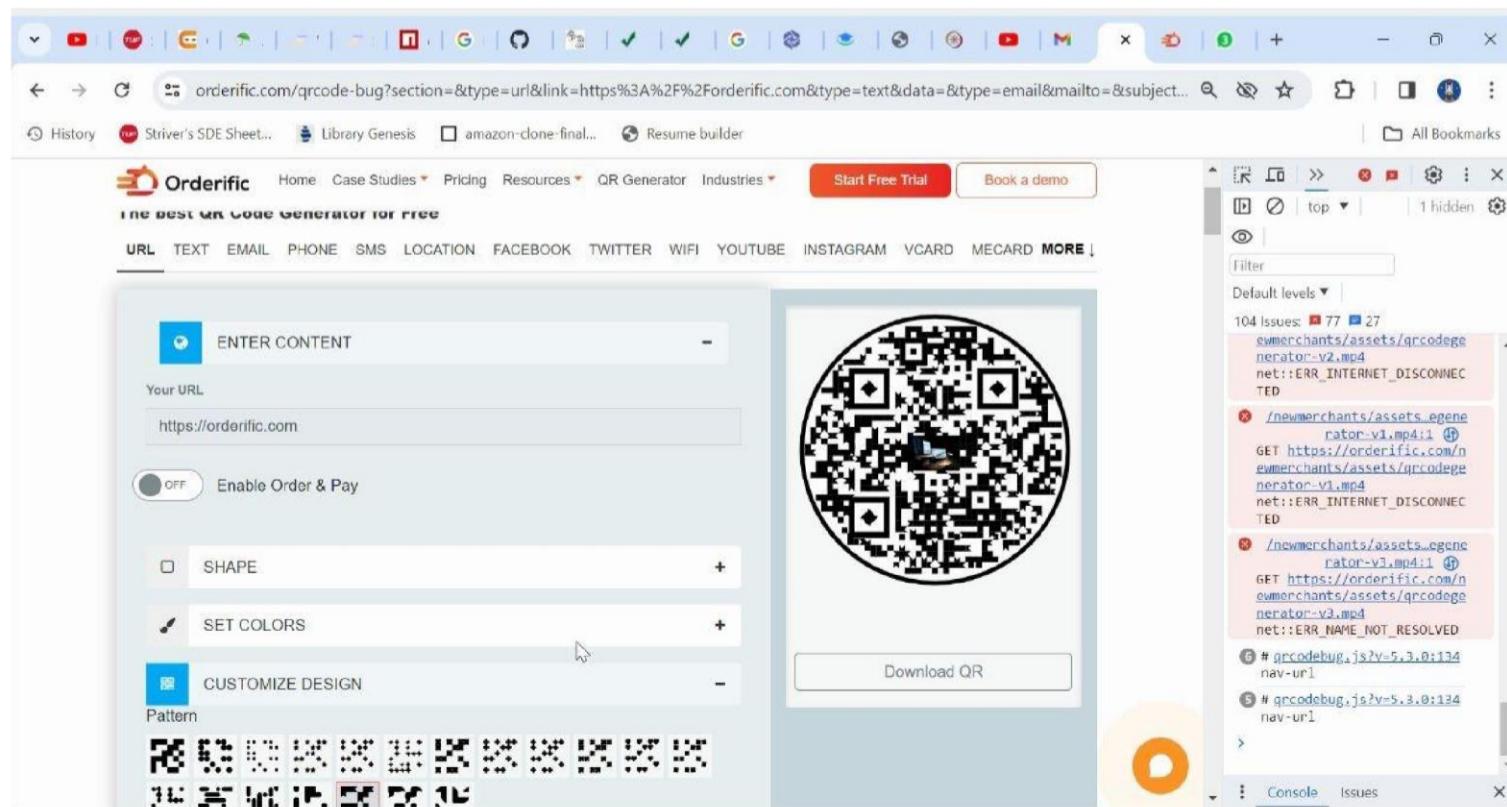

Steps- Click on the SHAPE button and select circle.

Click on the FRAME button and select any of the frames (e.g. the last one).

Description: When the QR code is in the shape of a circle, and the user selects any of the available frames, the QR code changes its shape back to the square.

01:27:01 | Screenshot • Comment

Steps- Click on the SHAPE button and select circle

Click on the CUSTOMIZE DESIGN button.

Description: When the user selects circle as a shape for the QR code, and clicks on the CUSTOMIZE DESIGN button, there will be only 19 patterns (the one that is missing is the one from BR-002 (special-diamond)).

01:34:55 | Screenshot • Comment

Customize your QR code:

By default, your QR code will have a square-shaped frame, and the symbols/patterns will be black on white background. However, Orderific gives you the option to customize your QR code to make it more appealing. You can change the shape of the frame, the color, and add a logo in the center of your QR Code.

ENTER CONTENT

Your URL
www.your-

Download the code:

After making the customizations, click the "Create QR" button to generate the QR code. You should then click the "Download QR" button to download the QR code file.

Issues Panel:

- 104 Issues: 77 27
 - /newmerchants/assets/_generator-v2.mp4 net::ERR_INTERNET_DISCONNECTED
 - /newmerchants/assets/_generator-v1.mp4 GET https://orderific.com/n/newmerchants/assets/_generator-v1.mp4 net::ERR_INTERNET_DISCONNECTED

 - # acodebug.js?v=5.3.0:134 nav-url
 - # acodebug.js?v=5.3.0:134 nav-url

Steps- Scroll down to the How do I create a free QR Code? section.

Description: The text and the title in the second step in the How do I create a free QR Code? section explains how to customize your QR code but the picture shows how to customize the URL.

- In simpler terms, the second step advises you to input the information you want your QR code to contain. It emphasizes the importance of accurately filling out all the required details. This ensures that when people scan your QR code, they are directed to the specific information or content you intended for them to see. Think of it like setting the destination for your QR code so that it guides your customers to the right place.

01:38:39 | Screenshot • Comment

 - # acodebug.js?v=5.3.0:134 nav-url

Steps- Scroll down to the How do I create a free QR Code? section.

Description: When the first two steps are changed according to section 1 & 2, the third step should have the text and title from the second step and a corresponding image.

- When you reach the third step in the 'How do I create a free QR Code?' section, you'll see a part called 'Customize your QR code.' Under the heading 'Customize your QR code,' you'll find some options to make your QR code look more interesting.
- By default, your QR code usually looks like a square with black patterns on a white background. But with Orderific, you get to be creative! You can change the shape of the square, pick different colors, and even add a logo in the middle of your QR code.
- Imagine it like this: it's not just a plain black and white square anymore; you can give it your own style by choosing different shapes, colors, and even adding your own logo to make it stand out.

01:44:04 | Screenshot • Comment

Download the code:

After making the customizations, click the "Create QR" button to generate the QR code. You should then click the "Download QR" button to download the QR code file.

Steps- Scroll down to the How do I create a free QR Code? section.

Description: When the first three steps are changed according to, the fourth step should be added, with the text and title from the third step and a corresponding image there is difference between actual image and the processed image.

Certainly! In simpler terms, here's what you can expect in the fourth step of creating a free QR code:

1. Generate QR Code:

- Click the "Create QR" button to create your personalized QR code.

2. Download Your QR Code:

- Once your QR code is ready, click the "Download QR" button.

Here's a simple image guide to help you:

[Image: A screenshot or illustration showing the "Create QR" button and the "Download QR" button]

By following these steps, you'll successfully generate and download your customized QR code.

01:51:37 | Screenshot • Comment

I'm new to QR Codes. What should I know?

Glad you asked! Here's a few basics to get you started.

What is a QR code?

QR code stands for Quick Response code, which is basically an encrypted symbol/pattern that can be scanned by a smartphone camera or any QR code scanner app to get more information about a given product or service. QR codes are usually square-shaped, and the symbol/pattern is generally printed in black on white background. Some of the common use cases of QR codes include restaurant menus, coupons, tracking products in the supply chain, etc.

It is not a must for a QR code to be square-shaped with black and white patterns. Sometimes different colors, shapes and even adding logos can be used to create a QR code. The shape and color don't really have any effect on the functionality of the QR code.

How do QR codes work?

Steps- Scroll down to the I'm new to QR Codes section

Description: There is a space between the word colors and a comma, we have to correct that.

01:53:33 | Screenshot • Comment

How do QR codes work?

QR codes were first used by the automotive industry in Japan to display more information to users than what the product packaging could accommodate. Users would simply scan the code and be redirected to the web page with more information about the product. QR codes are now used in almost every industry.

The good news is that creating one is pretty easy if you have the right tools like on Orderific. For instance, if you want to create a detailed menu for your restaurant, printing every detail of the different foods you offer will require using several pages of a booklet. However, using a QR code could save all these costs. We also give you free access to our new QR Code Pay and Order digital menu for anyone who runs a restaurant or other food businesses.

Instead of spending money to print the menu on all those pages, you can simply print a QR code on a single page, and it will serve the same purpose. Your customers will then scan it, and it will redirect them to a web page with your restaurant's detailed menu. So, how do you create one for your business? Let's find out.

Steps- Scroll down to the I'm new to QR Codes section and click on the How do QR codes work? card.

Description: The r in the QR Code Pay is not capitalized.

02:01:04 | Screenshot • Comment

A screenshot of a web browser displaying the Orderific website at <https://orderific.com/qrcode-bug?section=&type=url&link=https%3A%2F%2Forderific.com&type=text&data=&type=email&mailto=&subject=>. The page shows a yellow header with the Orderific logo and a QR code generator interface. Below the header is a dark footer with navigation links: About Us, Solution, Policy, and Location. A large yellow arrow points upwards from the footer towards the Policy link. The right side of the screen shows the developer tools' 'Issues' panel with numerous errors related to network issues and file paths.

Steps- Go to the footer
Location is not accessible
Description- The Cursor is not working there.
